The clouds have molecules that is violet and blue and that is how the clouds get their color and each of its colors was made up as its own wavelength. I never knew what made the sky blue until just. We sent you SMS, for complete subscription please reply.

The Martian sky typically appears a butterscotch yellow colour during the day. Because the sun goes down, it doesn't mean the world is colorless. Isaac Newton demonstrated with a prism that the white light of the sun contains all colors of the visible spectrum, so all colors are possible in sunlight. Sunlight, which appears white to the human eye, is a mixture of all the colors. Mrs. Great thinking, Chairty!
